Washington, Pa., July 25.—As the

ourth section of freight train 87, engine 09, on the Hempfield division of the Baltimore & Ohio road was passing the crossing at Elmwood station, two miles east of Washington, at 12:50 this afternoon, Brakeman W. S. Vanhorn, of Wheeling, who was on the third car from the engine, was horrified to see a runaway horse, drawing a buggy in which were seated two ladies and three children, come tearing down the road toward the train. The train was running thirty miles an hour and it was impossible to avert the terrible accident that quickly followed, as the brakeman could not signal to the engineer in time to stop before the collision occurred, One of the ladies leaped from the buggy just before it reached the track and sprang to the horse's head, attempting to quiet the frightened animal as it came to the track. She had not sufficient strength, however, to hold him, and is a moment the buggy was dashed to pieces sgainst a flat car and two of its occupants were hurled under the wheels of the car, while the horse was instantly killed.

through some process by which it is practically restored to the condition of unmanufactured scoured wool of the first class. In a letter to the Collector, Acting Secretary Batchellor says that the question as to the classification of merchandise of this character was decided by the Department on the 26th of October, 1887, and it was then, as it was on 13th of July, 1887, held that woolen waste which may have been broken up and put through the garnetting machine whereby it becomes practically scoured wool was dutiable at the rate prescribed for scoured wool, that is to say, when of the first class and costing under 30 cents per pound in the unwashed condition, at a duty of 30 cents per pound as assessed by you. per pound as assessed by you. The Collector's decision in the case in question is therefore affirmed.

The appraising officers recently in conference in New York considered the general question as to the proper classification of so-galled garnetted, carbonated and other similar wastes, and have reported to the Treasury Department that in their opinion any process of manufacture whereby the value and character of a refuse article, such as waste of wool, have been changed or enhanced and its identity as a waste or worthless substance destroyed so that it becomes scoured wool, it no longer belongs to the category of waste, but should be classified as scoured. The report says that "the so-called garnetted and carbonated waste have undergone a very decided process of manufacture; their value has been increased to within a trifle of the value of wool itself; their appearance is made so closely to resemppearanco is made so closely to resem-le the actual article as to deceive even experts, and by an admixture of the manufactured article with the natural wool their purposes of use are identigally the same, and should, in the opinion of the appraisers, be classified for
duty at the same rate as the wool from
which they come and which they so
closely resemble."

Closely Investigated.

WASHINGTON, July 25.—The committee appointed by Secretary Noble to inyestigate and report upon the manner of rerating pensions in the Pension Bureau rerating pensions in the Pension Bureau during the last year were to-day justily engaged in examining cases. It is stated at the Pension Office that in the event the committee discovers that reratings have been made in violation of the law the facts can be reported to the Commissioner, and the law points out the course he is and the law points out the course he is to pursue. The pensioners are given sixty days in which to show cause why their increased pensions were not illegally granted. If they fall to respond then the Commissioner can have their pension certificates recalled and the amount adjusted to its legal limits. He can demand that the back pension, if any, he retained, and he has full anthority to correct it as he would any other form of indebtedness. A statement is being prepared at the Pension Office showing the number of cases that have been made special for any cause during the four months of Mr. Tanner's administration. It is stated by pension officials that these special cases number legs than 1,000.

BISMARCK, DAK., July 25.—Major Warner, Commander-in-Chief of the G. A. R., and member of the Sloux commission, has arrived here and leaves for navaloincerscoath that the rumor was general in the Department.

Secretary Tracy has made himself a great favorite with the Navy people by his strict attention to the needs of the service and doing all in his power to expedite the building up of an efficient ileet of vessels. It is for this reason that all the Navy people interviewed hoped that the rumor was unfounded.

The track of the recent troubles between the Grand Army and the railroads with regards to rates to the National Encampment to be held at Milwaukee, he said the G. A. R. would go ahead with its encampment and will treat the people of Milwaukee with the respect and consideration to which their generous progration entitles them. He added significantly: titles them. He added significantly:
"We will settle with the railroads after-ward." He says that the eastern people will suffer little by the refusal of the

poing to Standing Rock by boat. It is at this place the commission will meet their most uncompromising and ablest opponents in the persons of Sitting Bull, Gall and John Grass, who are said to be as strongly opposed to the opening of the reservation as they were a year ago. THE PARNELL COMMISSION

Adjourns Until the 24th of October-The Evidence About all In. LONDON, July 25.—The Parnell Comdission entered upon its long recess today. When the court met this morning, Mr. Hardcastle, an accountant, was called to the witness stand. He stated that the books of the Land League which had been produced before the Commission covered the whole period of the League's existence. He could not say that £75,000 which was unaccounted for owing to the absence of the books of the Ladies' League, had been appropriated.

Mr. Soames, solicitor for the Times, in Mr. Soames, solicitor for the Times, in reply to a question by Mr. Sexton, said he could not tell within £10,000 the amount the Times had paid to witnesses. The sum, however, was very large. This concluded the taking of evidence. Mr. Sexton, replying to a question by Presiding Justice Hannen, stated that he could not sum up the case on behalf of the Parnellites until he had consulted with his colleagues.

the Parnellites until he had consulted with his colleagues.
Sir Henry James, of Counsel for the Times, stated that he was not in a position yet to reply to the whole case.
Presiding Justice Hannen informed Mr. Sexton that further evidence would be called if the Commission considered it necessary, but the reasons therefor must be exceptional. The court then adjourned until October 24.
Presiding Justice Hannen ordered that Mr. Thomas Condon and Mr. John O'Connor, members of the House of Commons, who while serving sentences in Ireland for oflenses under the Crimes

n Ireland for offenses under the Crime act, were brought to London to teatify before the Parnell commission, complete the remainder of their terms in a Lon

thall Games Played Yesterday. The Wheeling ball club yesterday ppened up another series of three games with the Canton club on the latter's rounds and was defeated by a score of to 2. For some unexplained reason a It to 2. For some unexplained reason a full special report of the game falled to come last night, but judging from the meagre report that was received, the game must have been a rather peculiar one. Wheeling made 17 hits off Stab as against 16 made by the home club off Meelan, and yet the report says that Wheeling was practically not in the game at all. The report states further that Canton's men hit the ball hard and at the right time and thereby earned seven, or one-half of their rims. It also makes mention of Williams, Dunn, Bownan and Hobreoht as playing good ball. The presumption is that to the other members of the Wheeling team are to be charged the five errors made that permitted seven unearned runs to be scored. Wheeling's hits must have been wonderfully well scattered and the fielding of the Cantonese must have been remarkable to have made it possible that seventeen hits should materialize into only two runs. The score by innings was as follows: full apecial report of the game failed to

"Has the firm made an assignment?" was asked of the man in command of the army of workers.

"Not yet" was the reply.
"Do you think the house will be tided over the difficulties?" Yes; but the members of the firm are not here and I can't speak authoritatively. I expect they will come to the store late this afternoon." The absence of Lewis Bros., & Co., from their place of business during the forenoon gave rise to the supposition that they were endeavoring to make arrangements to take up the protested notes. It was understood that if the firm could be given a little time they would be able to pay in full and continue business without detriment to either themselves or customers. The members of the house are Walter H. Lewis, Joseph W. Lewis, Henry Lewis and John L. Boarden, all well and widely known in the business community. GREAT OIL DISCOVERY. Alleged to be the Best Ever Made-It is in

the Rocky Mountains.
OTTAWA, ORT., July 25.—Major A. P. Patrick, Dominion Land Surveyor of Calgary, writes from the Summit, Crows Neck Pass, Rocky Mountains, July 13. In his letter he says that he and a fellow surveyor had been prospecting for eleven weeks in the Rocky Mountains for coal oil deposits, and that they had struck oil deposits, and that they had struck one of the richest deposits ever found. Samples slowed 91 per cent lubricating oil, 5-per cent heavy oil and the remainder water and foreign substances. This is declared to be the best oil ever discovered. The particle has had registered in his own name forty acres of the cast side of the summit and 500 acres in British Columbia. As it is 4,500 feet above the sea level the crude oil can be run off any distance.
